

In order to offer customers a fast and efficient service within the garden centre sector, retailers require high-performance retail technology which not only offers faster transactions at the point of sale, but also provides easy access to retail garden centre management activities such as reporting, stock, sales and suppliers.

With our POSitive GEM EPOS solution, you can take complete control of your inventory and enjoy greater flexibility. Implement hand-held terminals for speedy stock-taking and customer orders & pick lists at the touch of a button. Offer your customers multiple promotions and loyalty cards, and benefit from full sales and stock visibility – all from your intuitive POSitive GEM system.

Key features:

- Point of sale Tills – with robust, fast, intuitive and fully customisable touchscreens
- Hand-Held Sales -walk around with customers & generate sales orders, check prices in real-time with instant checkout.
- Supplier database – with multiple contact details, lead time & shipping preferences
- Product database – for comprehensive real-time product information including stock levels at multi-locations
- Label printing -Print all your horticultural labels, swing tags, shelf labels and more
